

## Tasks and questions

Throughout this user testing, I want you to think aloud and respond to everything that you see on the screen. I want you to be honest with your feedback, as it will help me to do better with my visualization.

1. As you see this visualization, what are your thoughts on this? Can you identify what this information visualization is about and what is its purpose?

Listed below are some tasks that I want you to accomplish by navigating through this visualization.

1. Can you understand the meaning of mission status and rocket status? (How efficient you were with this task 1-5)
2. Can you tell when the number of space missions for Europe started rising? (How efficient you were with this task 1-5)
3. Which country had the least number of launches till now? (How efficient you were with this task 1-5)
4. Can you tell how many rockets were launched in the first half of July in 2020? (How efficient you were with this task 1-5)

Now that you have completed your tasks, what are your thoughts on these visualizations?

Was the visualization appropriate as per the information?

How do you find the visual aesthetics of these visualizations?

Any final suggestions, where you think this visualization is lacking, and ways to improve them?
